ABI's Latest Expert in their "Ask-the-Expert" Series

For Immediate Release

Tuesday, March 4, 2008

Contact: Jennifer Bush
Amoskeag Business Incubator
(603-629-9511)

Manchester - This fully interactive service developed by the **Amoskeag Business Incubator** (ABI) is a business development forum where you may ask questions and receive candid answers from business professionals who are experts in their field. We are pleased to announce that our April expert offers advice regarding business technology.

Marc Berthiaume founded MJB Technology Solutions to provide small and medium sized businesses with technology services that are typically only available in larger companies. By focusing on integrating people, technology and processes, MJB Technology works with clients to shift their thinking about Information Technology from a reactive, fire fighting approach, to a proactive one that identifies and addresses issues before they negatively impact business.

To meet our expert featured during the month of March, **Wit Jones of the US Small Business Administration**, please visit www.abi-nh.com and click on the "Ask-the-Expert" tab to enter the forum and gain valuable business tips and tools.

We believe this service further supports the mission of the ABI, which is to provide a supportive entrepreneurial environment that stimulates business growth and spurs job creation. For more information regarding this service, please contact the Incubator at 629-9511, visit the website www.abi-nh.com or email info@abi-nh.com.
